Take a moment to examine your ERD. Does the Rockbuster database have a snowflake schema or a star schema? Write a brief explanation for your answer.

- The Rockbuster database has a snowflake schema, it does include dimensions and sub-dimensions tables. The fact tables are payment and rental. Looking at the staff table which is a dimension table is linked to sub-dimension tables like address, city and country.

List all the fact tables and all the dimension tables in the schema. For each table, list every column and its data type, and write a brief description of the column.

Fact tables:

- Payment
- Rental

Dimension tables – Staff

- Customer
- Inventory
- Film actor
- Film category
- Store

Sub-dimension tables

- Actor
- Film
- Language
- Category
- Address
- City- Country

Facts Tables

Table Name	Columns	Data Type	Description
payment	payment_id	Integer	ID for payment
	customer_id	Smallint	Customer ID
	staff_id	Smallint	Staff ID
	rental_id	Integer	Unique identifier for the rental
	amount	Numeric	Payment amount
	payment_date	Timestamp	Payment date
Rental	rental_id	Integer	Unique identifier for the rental
	rental_date	Timestamp	Rental date
	inventory_id	Integer	Inventory number
	customer_id	Smallint	Customer ID
	return_date	Timestamp	Date and time film was returned
	staff_id	Smallint	Staff ID
	last_update	Timestamp	Time and date of last update

Dimensional tables

Table Name	Column	Data Type	Description
Staff	staff_id	Serial	Staff ID
	first_name	Varchar(45)	Staff first name
	last_name	Varchar (45)	Staff last name
	address_id	Smallint	Staff address
	email	Varchar (50)	staff email address
	store_id	smallint	store ID
	active	Boolean	true/false active staff member
	username	varchar(16)	username

	password	varchar(40)	password
	last_update	timestamp	Date and time last of update
	picture	bytea	Staff photo
Customer	customer_id	serial	Customer ID
	store_id	smallint	Store ID
	first_name	varchar(45)	Customer first name
	last_name	varchar(45)	Customer last name
	email	varchar(50)	Customer email address
	address_id	smallint	Customer address
	activebool	Boolean	True/false active customer
	create_date	date	Registration of customer
	last_update	timestamp	Date and time of last update
	active	integer	Binary
Inventory	inventory_id	serial	Inventory ID
	film_id	smallint	Film ID
	store_id	smallint	Store ID
	last_update	timestamp	Date and time of last update
Film_actor	actor_id	smallint	Actor ID
	film_id	smallint	Film ID
	last_update	timestamp	Date and time of last update
Film_category	film_id	smallint	Film ID
	category_id	smallint	Category ID

	last_update	timestamp	Date and last time of update
Store	store_id	serial	Store ID
	manager_staff_id	smallint	Manager staff ID
	address_id	smallint	Address ID
	last_update	timestamp	Date and time of last update
Actor	actor_id	serial	Actor ID
	first_name	varchar(45)	Actor first name
	last_name	varchar(45)	Actor last name
	last_update	timestamp	Date and time of last update
Film	film_id	serial	Film ID
	title	varchar(255)	Film name
	description	text	Film description
	release_year	year	Year of release
	language_id	smallint	Film language
	rental_duration	smallint	Rental duration
	rental_rate	numeric(4,2)	Cost of rent
	length	smallint	Film duration
	replacement_cost	numeric(5,2)	Cost of replacement
	rating	mpaa_rating	Film rating
	last_update	timestamp	Date and time of last update
	special_features	text	Extra like behind the scenes
	fulltext	tsvector	Film feature keywords

Language	language_id	serial	Language_ID
	name	varchar(20)	Original language
	last_update	timestamp	Date and time of last update
Category	category_id	serial	Category ID
	name	charvar(25)	Action, Roamnce, Comedy etc.
	last_update	timestamp	Date and time of last update
Address	address_id	serial	Address ID
	address	varchar(50)	Street name and number
	address2	varchar(50)	When needed
	district	varchar(20)	District, state, region
	city_id	smallint	City ID
	postal_code	varchar(10)	Postal code/ zip code
	phone	varchar(20)	Phone number
	last_update	timestamp	Date and time of last update
City	city_id	serial	City ID
	city	varchar(50)	City name
	country_id	smallint	Country ID
	last_update	timestamp	Date and time of last update
Country	country_id	serial	Country ID
	country	varchar(50)	Country name
	last_update	timedstamp	Date and time of last update

Which actors brought Rockbuster the most revenue?

This is how I'll go about it to get the answer

-inventory -rental -film_actor -actor

What language are the majority of movies in the collection?

-film -language
